Protecting critical infrastructure from drone threats with **actionable intelligence**

convergint®

Convergint **value**

Drones pose a significant threat to **electrical utility infrastructure** by enabling nefarious actors to damage critical equipment and disrupt the power grid. Convergint provides drone **detection solutions** for the utility industry that detect, classify, locate, and track both drone and pilot simultaneously, delivering an early warning to security teams to respond quickly and effectively before critical security events occur. Leveraging existing systems, Convergint integrates proactive, scalable detection solutions to promote **safety and security** within critical infrastructure facilities.

Convergint **solutions**

- ✅ **Accurate detection**
- ✅ **Located drones & pilots**
- ✅ **Detection of all drones & manufacturers**
- ✅ **Automated configurable alerts**
- ✅ **Mobile sensor recognition**
- ✅ **Satellite map data**
- ✅ **Coordinated attack detection**
- ✅ **Seamless integration**
- ✅ **Rapid alerting**
